

Public Trading Risk Disclaimer

Effective Date: September 2, 2026

TRADING FUTURES, OPTIONS, SECURITIES, FOREIGN CURRENCY, CRYPTOASSETS, AND OTHER LEVERAGED OR VOLATILE PRODUCTS INVOLVES SUBSTANTIAL RISK. YOU MAY LOSE SOME OR ALL OF YOUR CAPITAL AND, FOR SOME PRODUCTS, MORE THAN YOUR INITIAL DEPOSIT. USE ONLY RISK CAPITAL.

CFTC RULE 4.41 - HYPOTHETICAL OR SIMULATED PERFORMANCE RESULTS HAVE CERTAIN LIMITATIONS. UNLIKE AN ACTUAL PERFORMANCE RECORD, SIMULATED RESULTS DO NOT REPRESENT ACTUAL TRADING. ALSO, SINCE THE TRADES HAVE NOT BEEN EXECUTED, THE RESULTS MAY HAVE UNDER-OR-OVER COMPENSATED FOR THE IMPACT, IF ANY, OF CERTAIN MARKET FACTORS, SUCH AS LACK OF LIQUIDITY. SIMULATED TRADING PROGRAMS IN GENERAL ARE ALSO SUBJECT TO THE FACT THAT THEY ARE DESIGNED WITH THE BENEFIT OF HINDSIGHT. NO REPRESENTATION IS BEING MADE THAT ANY ACCOUNT WILL OR IS LIKELY TO ACHIEVE PROFIT OR LOSSES SIMILAR TO THOSE SHOWN.

THESE RESULTS ARE BASED ON SIMULATED OR HYPOTHETICAL PERFORMANCE RESULTS THAT HAVE CERTAIN INHERENT LIMITATIONS. UNLIKE THE RESULTS SHOWN IN AN ACTUAL PERFORMANCE RECORD, THESE RESULTS DO NOT REPRESENT ACTUAL TRADING. ALSO, BECAUSE THESE TRADES HAVE NOT ACTUALLY BEEN EXECUTED, THESE RESULTS MAY HAVE UNDER- OR OVER-COMPENSATED FOR THE IMPACT, IF ANY, OF CERTAIN MARKET FACTORS, SUCH AS LACK OF LIQUIDITY. SIMULATED OR HYPOTHETICAL TRADING PROGRAMS IN GENERAL ARE ALSO SUBJECT TO THE FACT THAT THEY ARE DESIGNED WITH THE BENEFIT OF HINDSIGHT. NO REPRESENTATION IS BEING MADE THAT ANY ACCOUNT WILL OR IS LIKELY TO ACHIEVE PROFITS OR LOSSES SIMILAR TO THESE BEING SHOWN.

Futures and Options trading has large potential rewards, but also large potential risk. You must be aware of the risks and be willing to accept them in order to invest in the futures and options markets. Don't trade with money you can't afford to lose. This is neither a solicitation nor an offer to Buy/Sell futures or options. No representation is being made that any account will or is likely to achieve profits or losses similar to those discussed. The past performance of any trading system or methodology is not necessarily indicative of future results.

This Public Trading Risk Disclaimer ("Public Disclaimer") is provided by CipherTrades L.L.C. d/b/a MtnSkyAlgo ("MtnSkyAlgo," "Company," "we," "us," or "our") for every person who watches, reads, hears, accesses, or receives public or free Content. It is a risk warning and informational notice. It is not an offer, solicitation, recommendation, individualized advice, or promise of results.

1. Scope and Public Audience

This Public Disclaimer applies to all free or publicly accessible livestreams, broadcasts, recordings, clips, videos, posts, captions, comments, chats, charts, screenshots, examples, demonstrations, interviews, profile pages, links, and other Content made available by or for the Company through <https://mtnskyalgo.com>, <https://ciphertrades.com>, TikTok, YouTube, Instagram, Facebook, X, Twitch, Discord, TradingView, Linktree, or any current or future media, streaming, community, or social platform.

It applies whether the Viewer is a customer, prospective customer, follower, subscriber, community member, guest, or casual viewer, and whether the Content is live or recorded, public or restricted, free or paid. Passive viewing alone is not treated as contractual acceptance where applicable law requires more, but every Viewer should read and act on these warnings before making a trading decision.

2. General Education Only; No Individualized Advice

All Content is general educational and informational material. It does not consider any Viewer's objectives, finances, holdings, experience, tax status, risk tolerance, liquidity needs, or circumstances. Nothing is individualized investment, financial, legal, tax, accounting, brokerage, commodity-trading, or fiduciary advice, or an offer, solicitation, recommendation, instruction, or invitation to buy, sell, hold, or enter any instrument or transaction.

The Company does not accept custody of trading funds, open or manage brokerage accounts, execute or route trades for Viewers, control positions, guarantee fills, or promise results. Unless separately and expressly disclosed, the Company is not acting as a broker-dealer, investment adviser, commodity trading advisor, commodity pool operator, futures commission merchant, introducing broker, fiduciary, tax adviser, or account manager for any Viewer.

3. Substantial Trading and Market Risk

Trading can produce rapid and substantial losses. Leverage, margin, assignment, expiration, liquidation, gaps, volatility, illiquidity, spread, slippage, latency, rejected orders, exchange action, broker action, financing, taxes, outages, data errors, and cybersecurity events can materially change outcomes. Options may expire worthless. Short-sale losses can be unlimited. Some futures, forex, cryptoasset, and leveraged-product structures can produce losses greater than the initial deposit. Digital assets may be permanently lost through fraud, hacking, custody failure, private-key loss, smart-contract defects, stablecoin depegging, forks, or regulatory action.

4. Hypothetical, Simulated, Backtested, and Historical Results

Hypothetical, simulated, backtested, paper-traded, optimized, reconstructed, or model results do not represent actual trading. They may use hindsight, selected dates, favorable parameters, assumed fills, continuous liquidity, survivorship, reinvestment, omitted costs, ideal execution, or information unavailable in real time. Actual results may differ materially because of fees, commissions, spread, slippage, latency, financing, taxes, liquidity, market impact, position size, account restrictions, rejected orders, data differences, and changing market conditions. Past performance is not necessarily indicative of future results.

A link to this Public Disclaimer or to a complete Risk Agreement does not replace a disclosure that applicable law requires to appear prominently and immediately next to a particular hypothetical or simulated performance presentation.

5. Indicators, Scripts, Alerts, Scores, and Model Risk

Indicators, scripts, alerts, charts, scanners, scores, ratings, labels, percentages, tables, and other analytical outputs are aids only. They are not order instructions, probabilities of success, win rates, profit forecasts, guarantees, autonomous account management, or recommendations. Signals can be early, late, false, duplicated, omitted, revised, repainted, recalculated, delayed, or unsuitable for a symbol, timeframe, market regime, account, platform, or trading style.

Use of terms such as AI, algorithmic intelligence, confidence, strength, bull, bear, or similar branding does not represent predictive certainty, human-like intelligence, a particular machine-learning architecture, or achievable performance. Output-detection, performance, and statistics tables may use simplified tracking and may omit overlapping positions, realistic order sequencing, intrabar movement, slippage, commissions, spread, market impact, rejected orders, or a same-bar target and stop.

6. Livestreams, Social Media, and Third-Party Content

Livestreams and social-media Content are time-sensitive and may be incomplete, delayed, mistaken, outdated, abbreviated, or taken out of context. A presenter may hold, later trade, or change a view about an instrument without notice. Silence is not advice, and no person has a duty to update every prior statement. Comments, chats, guest statements, member posts, and third-party content are not verified, adopted, or endorsed merely because they appear near Company Content.

6A. Prop-Firm Promotions and MSA PropBot

Prop-firm deals, coupon codes, links, and PropBot outputs are time-sensitive third-party promotional information provided for convenience only. They are not advice, recommendations, endorsements, due diligence, or guarantees of a firm's legitimacy, solvency, registration, suitability, rules, discount, evaluation result, or payout. Promotions, fees, restrictions, and firm terms may change after publication, and API or bot information may be incomplete, stale, incorrectly scoped, or wrong.

MtnSkyAlgo is not affiliated with or sponsored by listed prop firms and currently receives no compensation from PropBot codes or links. An independent code owner may receive compensation. Verify the firm identity, final price, code, eligibility, restrictions, and complete terms directly at checkout. Prop-firm evaluations and trading involve substantial risk, including loss of fees and denial of access or payouts.

6B. Economic News, Calendar Data, and Futures Planning Utilities

NewsBot, economic-calendar output, event alerts, reported values, source links, and impact classifications are general informational conveniences only. Information may be preliminary, delayed, stale, incomplete, revised, duplicated, omitted, misclassified, or wrong because of source, API, feed, database, software, network, Discord, hosting, time-zone, or human error. Government and other sources may change schedules or values. An impact label is not a prediction or guarantee of price direction, volatility, liquidity, timing, magnitude, execution, or trading opportunity.

The Futures Planning Utility, also described as the SL/TP calculator, performs arithmetic only from User-entered values and built-in or custom contract specifications. It does not receive live market or margin data, inspect an account, monitor positions, place orders, or account for every fee, commission, spread, slippage amount, fill, gap, broker or exchange rule, margin change, tax, outage, or loss beyond a planned stop. Inputs, specifications, formulas, rounding, and outputs may be outdated, incomplete, unavailable, or wrong.

Neither tool provides financial, investment, commodity-trading, brokerage, legal, accounting, or tax advice, and neither should be relied upon as the sole or primary basis for a transaction. Verify every material input and output with the applicable official source, exchange, and broker. Each User remains solely responsible for all trading decisions, orders, losses, costs, and results.

7. Testimonials, Screenshots, and Performance Claims

Testimonials and viewer posts reflect individual experiences and may be atypical. They are not guarantees of future performance or success. Screenshots, winning trades, account values, earnings statements, and success stories may omit losses, fees, deposits, withdrawals, risk, leverage, and the relevant period, and may be incomplete or unverifiable. A compensated, rewarded, affiliated, or otherwise connected endorser should disclose the material connection clearly.

8. Independent Judgment; No Reliance or Guarantee

You alone decide whether, when, where, how, and in what size to trade. Independently verify every fact, price, signal, chart, instrument specification, trading hour, margin requirement, order, fill, position, and account balance before acting. Use only money you can afford to lose without impairing essential financial needs. Consult appropriately licensed professionals when needed. No representation or warranty is made that any account will make a profit, avoid a loss, match an example, receive an alert, replicate a methodology, achieve a stated win rate or drawdown, or experience uninterrupted availability, accuracy, compatibility, or security.

9. Complete Governing Documents

Customers, members, and Users are also subject to the Terms of Service, Privacy Policy, Refund and Cancellation Policy, Risk Disclosure and User Agreement, and Discord Server Rules where applicable. Those documents contain additional licenses, risk allocations, warranty disclaimers, liability limitations, releases, indemnification obligations, and dispute-resolution provisions. This Public Disclaimer supplements and does not narrow those documents.
